## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 17-23, 26-32, 35-44, 46-55, 57-61 are rejected under 35 U.S.C. 102(e) as being anticipated by Lustig et al (5433651).

Lustig et al disclose a polishing pad having a first layer being a polishing surface (66) with an aperture, a substantially transparent section (72) in a second layer (which is the top of element (62)), motor (col.4, line 42), a carrier head (60) , and a light beam (77).

### ***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 24-25 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lustig et al (5433651).

a. Lustig et al are discussed above.

b. Lustig et al discloses the claimed invention except for the making a layer and transparent section out of a polyurethane material. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have used a polyurethane material form a layer and transparent section, since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. *In re Leshin*, 125 USPQ 416.

***Allowable Subject Matter***

5. Claims 33-34, 45, and 56 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
